Similar manuals You can write in English language into the forum not only in Hungarian. It features a CD player, a USB 2.0 port, an auxiliary input port on the face panel so you can play songs from almost any digital portable sources available in today's market. Pioneer DEH2450UB can be used with two front speakers and two rear speakers and a subwoofer as well. The display shows song information in white. It features 16 buttons on the face panel including an equalizer, List folder and song display, SRC source select, S.Rtrv Sound retrieve buttons located on the front panel. The display is clear and soothing to your eyes even in dark. Pioneer DEH2450UB also features a wired remote and antenna input.

The back panel also features power chord input and a heat sink. It will enhance the look of your car's interior. Pioneer DEH2450UB produced very deep bass and high fidelity no matter what the source was. We played different genres of songs from CDs, iPod, HTC and iPhone. We tried the auxiliary input to play songs directly from iPhone. In every case, Pioneer DEH2450UB produced clean, distortionfree sound through the two front and two rear speakers we had preinstalled in our car. Even at 90% volume, the stereo did not produce any distortion. The builtin amplifier can be used for subwoofer output. The wiring diagram is given in the user manual for this. In order to check the builtin amplifier's power, we tried Pioneer DEH2450UB audio receiver in a different car with a subwoofer. It produced an extraordinary bass in this configuration. The sound output was loud and it created such vibration in the car that we could feel the music in our body. The List button gives you an easy way to browse a large list of songs. The radio reception is excellent. We could listen to the radio without any loss of radio signal even when we took the car to basement parking. The builtin amplifier lets you add a subwoofer to your car audio system, so you need not buy an additional amplifier unless you want the whole town to know that you are playing music. The radio reception is very good if not great. AffordableProductReview gives Pioneer DEH2450UB a 4.5star rating. Features iPod control, USB, Auxin, and CD player. Comes with subwoofer and wired remote input. No need for an additional amplifier. Great radio reception. Costs more than other head units of its class Read more about cookies in our Privacy Policy.
