It can be used to reduce the power consumed in your home while you are away. T o check the char ge level, press and hold the remote Power button and observe the indicator color. T o r eset your system, press and hold the Reset button on the bottom panel for 10 seconds. C lick here for more information on the types of cookies we use and how to change your cookie settings. Turn it up and feel the difference. Tap the "Microphone off" button to cut all power to the microphones at any time. You will still have access to all other features. A light bar helps indicate when the speaker is listening, thinking or speaking. But music is just the beginning. You have access to things like weather reports and news headlines too. So if you want to hear something, just ask. If you can get it on your device, you can hear it through the Bose Home Speaker 300. Plus, it's another simple way to control the Bose Home Speaker 300. Setting up presets with the app is easy, so the music you love is just one touch away. And multiple users can personalise their experience and content. Plus, the app makes setup easy by walking you through each step.

They all work together, so you can add another whenever you want to enjoy more music in more rooms. And with voice assistants built in to each product, you have instant access to all your music—hands free. Or you can manage everything from the Bose Music app. Bring all of your entertainment to life—music, movies and TV—in any room you want. We want to hear about it.Highly recommend this speaker. With the Google Assistant and Amazon Alexa builtin, you can enjoy millions of songs, playlists and more with just your voice. And you have the freedom to control the music your way—using your voice, a tap on the top controls or the Bose Music app. Plus, future software updates will add new features. The Bose Home Speaker 500 is our bestperforming smart speaker, a larger speaker with stereo sound aimed left and right to produce the widest sound of any smart speaker. The Bose Home Speaker 500 also includes an LCD screen to show you what's playing. Or you can set a preset via the Bose Music app. You can also use a Bluetooth or aux connection. All of these nonvoice sources are available regardless of whether the microphones are turned off or whether the Google Assistant or Amazon Alexa are enabled. Then go to your mobile device's Bluetooth settings, ensure it is available for connection and select the Bose Home Speaker 300 from the list. After you have initially paired to a Bluetooth device, you can simply tap the Bluetooth button on the speaker once to reconnect to the last connected device. You can also easily reconnect previously connected mobile devices from their Bluetooth settings page, and you can use the Bose Music app to reconnect or manage your speaker's paired device list at any time. You can also use the Bose Music app to put your speaker into Bluetooth pairing mode by simply selecting Bluetooth as the speaker's source in the app. Then go to your mobile device's Bluetooth settings and select the Bose Home Speaker 300 from the list.

However, it's easy to switch between devices using the Bose Music app or the Bluetooth settings on the selected device. Or at a holiday home Proprietary digital signal processing enables the Bose Home Speaker 300, a mono speaker, to preserve and reproduce more of a recording's original stereo audio content when compared to other mono speakers. Proprietary digital signal processing also enables the Bose Home Speaker 300 to maximise audio output from its small size and to produce surprisingly deep bass, leveraging an advanced acoustic port design with Bose's innovative QuietPort technology. However, you cannot play synchronised multiroom content across the Bose Home Speaker 300 and either Bose SoundTouch products or products from other manufacturers including Google or Amazon. The Bose Home Speaker 300 works in synchronised multiroom groups with any combination of additional Bose Home Speaker 300 units, the Bose Home Speaker 500, the Bose Soundbar 500 or the Bose Soundbar 700. However, the Bose Home Speaker 300, Bose Home Speaker 500, Bose Soundbar 500 and Bose Soundbar 700 can interoperate with Bose SoundTouch products to some extent through Alexa. There are no plans to update Bose SoundTouch products to be compatible through the Google Assistant in a similar fashion. With Alexa, users can speak to the Bose Home Speaker 300, Bose Home Speaker 500, Bose Soundbar 500 or Bose Soundbar 700 to initiate or control music on any Bose SoundTouch speaker in their home. This requires that the user has enabled the Bose smart home skill for SoundTouch in the Alexa app. For example, a user can ask Alexa on their Bose Soundbar 500 to "Play The Beatles on my living room SoundTouch 20" or "Turn off the kitchen SoundTouch 10". This feature still does not allow the Bose Home Speaker 500, Bose Soundbar 500 and Bose Soundbar 700 to be grouped with Bose SoundTouch products for synchronised multiroom playback.

Bose SoundTouch speakers are a broader family of WiFi speakers that provide Bose quality sound with easy access to your music. Bose SoundTouch products use the Bose SoundTouch app for setup and control of integrated WiFi music services. Bose SoundTouch speakers do not have the Google Assistant or Amazon Alexa builtin, although they may be controlled by voice using separate devices like the Amazon Echo and Echo Dot. C lick here for more information on the types of cookies we use and how to change your cookie settings. They cannot work together on different networks. Note A guest network is considered a different network, even if it's transmitted by the same router or access point If the system or AirPlay device is not connected or has poor connectivity to the network, move it closer to the router Note The distance between system and device is not important. They must both be in range of the router For SoundTouch Portable systems, hold the Aux button for about 15 seconds until the display turns off Please feel free to share additional comments below. The SA5 amplifier also has three aux ports so you can connect nonstreaming sources, such as a CD player. If you can get it on your device, you can hear it through the SoundTouch SA5 amplifier. Music services may vary. If you start with the SA5 amplifier hooked up to outdoor speakers, you can add more at any time It could be inceiling speakers in the basement, your home stereo in your living room, then a SoundTouch 10 speaker for the kitchen.SoundTouch lets you take total control of your listening experience, right from your smartphone or tablet. Easily personalise presets for onetouch access to the music you love, and control one or many SoundTouch speakers around your home. It can also run two pairs of speakers in parallel, so you can wire four speakers to the amp. It's

extremely clean sound and intuitive app that helps you run it in a stereo pair or mono.SoundTouch products use the SoundTouch app, while the Bose Home Speaker family uses the Bose Music app. However, Apple device owners can use Apple AirPlay 2 to group the SoundTouch SA5 amplifier with Bose Home Speaker family products for multiroom synchronised playback. Apple AirPlay 2 requires a WiFi connection. The Bose 901 speakers are active speakers and therefore will not work with the SoundTouch SA5 amplifier. When running two pairs of speakers, we recommend using speakers rated no lower than 8 ohms. All attached speakers will work together as one SoundTouch zone. It can be used with outdoor speakers, but must be placed inside while the speakers are outside. If the SA5 is wired to Ethernet, it may be placed in a metal wall panel or cabinet, as long as the location of the SA5 is well ventilated. Please refer to the Owner's guide for appropriate spacing. C lick here for more information on the types of cookies we use and how to change your cookie settings. Anywhere with WiFi, you can control it with your voice and stream music directly from the cloud.

Outside WiFi range, you can control it like any other portable speaker, with your mobile phone or tablet via Bluetooth and listen to anything you can play on your device. And no matter what you listen to or where you listen to it, you'll hear it all in 360 degrees of astonishing Bose sound. It's the home speaker you won't want to leave home without. Or place it in the corner of the room and the sound will feel like it's all around you. Plays for up to 12 hours per charge. With the Google Assistant and Alexa builtin, just say the word to stream all of your favourite music, Internet radio stations, podcasts and audiobooks—plus get weather, send messages, set timers, add to your todo lists and control smart home accessories too. Everywhere else, you can use Bluetooth to listen to anything your mobile phone or tablet can play. Apple users can also use AirPlay 2 to play audio from their devices too. Then use the app to easily browse through all of your music in one place, seamlessly jump between stations, playlists and services, and keep your speaker's software up to date. The Bose Music app also lets you group your Bose Portable Smart Speaker with any other Bose smart speakers or soundbars you have for a seamless audio experience throughout your home. Listen to different songs in different rooms, or one song in every room at the same time and get everyone singing along. Start with one and add more at any time. Because nothing makes a home feel homelier than having every room filled with astonishing Bose sound. Keep your speaker's battery full when you're not using it—or keep the music playing even while you're charging it. We want to hear about it.The sound that it eminates is beyond the sound you get from a home sound system. Wow!!! Also got the new TV speaker that can sync to portable home speaker. I enjoy listening to music inside and out when cooking out, hanging out by the pool, etc. This works great for that.

It produces surprisingly spacious audio, including deep, rich bass, which spreads evenly in all directions so it envelops you from every angle. It's batterypowered, so you can easily take it with you all around your home and ask the Google Assistant or Amazon Alexa for music. And you can group it with other Bose smart speakers and soundbars to fill your home with sound—or even send synchronised audio to a Bose Bluetooth speaker or pair of headphones. Acoustically, the Portable Smart Speaker and the Home Speaker 300 have comparable performance, with the same 360degree sound and impressively rich bass from similarly compact sizes. Meanwhile, the larger Bose Home Speaker 500 is our bestsounding smart speaker, providing walltowall stereo sound from a single enclosure. The Home Speaker 500 also includes a display screen to show you what's playing. Finally, the Portable Smart Speaker is water resistant and does not have an aux input, while the Home Speaker 300 and 500 are not water resistant and do include aux. All three speakers share the same voice, app and software features, including your choice of the Google Assistant or Amazon Alexa, compatibility with the Bose Music app, Apple AirPlay 2, Bluetooth, the ability to synchronise in multiroom groups and more. While you're doing this, the sides of the light ring should glow white and increase in size The Bose Portable Smart Speaker also has Bluetooth capability. Additionally, you can play music on the Bose Portable Smart Speaker from the Spotify app on a smartphone, tablet or computer using Spotify Connect, and from an Apple device via Apple AirPlay 2

compatibility for streaming content like Apple Music. WiFi is required for smart features such as voice control through the Google Assistant or Alexa, Apple AirPlay 2, Bose Music app control and content browsing, multispeaker grouping and more.

At that point, if you want to keep playing, just press the Bluetooth button on the speaker to connect to your mobile device and play content from there. If you start playback over Bluetooth away from WiFi and then bring the speaker home to a WiFi network, it will reconnect to WiFi in the background without interrupting your music. It will last for over 24 hours in standby mode, listening for voice commands. And if you turn it off completely for storage, travel or battery saving, it will last for a month or more. Using a thirdparty USBC cable or power source may increase charging time. This button completely cuts power to the microphones, so the speaker will not hear any commands. For security reasons, it is not possible to use a voice command or the Bose Music app to turn the microphones on or off. Only physically tapping the button can control the microphones. When the microphones are off, the red light beside the button will always be lit up. Simply press the microphone button again if you want to turn the microphones back on. You can also use a Bluetooth connection, Spotify Connect or Apple AirPlay 2. All of these nonvoice sources are available regardless of whether the microphones are turned off or whether the Google Assistant or Amazon Alexa are enabled. That means you can use the Portable Smart Speaker as a voicecontrolled smart speaker all around the home—ask it for music in the kitchen, on the patio or even yell to it from the shower. While the speaker should not be submerged under water, it can easily withstand spray from sitting next to the sink, the pool or the shower. However, it's easy to switch between devices using the Bose Music app or the Bluetooth settings on the selected device. An ultraefficient, highexcursion transducer aims downwards into an acoustic deflector to radiate rich sound uniformly in every direction, while three passive radiators deepen the bass by increasing the vibrating surface area of the speaker.

Placed in the middle of the room, a corner or anywhere in between, the Bose Portable Smart Speaker delivers the same impressive audio experience for everyone. Music is clear, surprisingly spacious and remarkably loud for a product of this size. And coming soon, you can also send synchronised audio from the Bose Portable Smart Speaker to one additional Bose Bluetooth product, such as a portable speaker or pair of headphones. However, you cannot play synchronised multiroom content across the Bose Portable Smart Speaker and either Bose SoundTouch products or products from other manufacturers including Google or Amazon.
